SUBJECT INDEX, VOLUME 54

Acrylonitrile, copolymerization, S32
  electrolytic and sodium reduction polymerization, 107
Acrylyl glutamic acid, effect of asymmetric centers, 491
Active centers, deactivation, polydimethylsiloxane, 375
Aging, polychloroprene, effect on crystallization, 17
Aldehyde, and phenol, chlorination, 645
  polymerization, S34
  stereoregulating effects on vinyl chloride polymerization, 31
Alkali metal polymerization, *tert*-butyl vinyl ketone, S30
Amino alcohols, synthesis by lithium aluminum hydride on oligamides, 101
ϵ-Aminocaproic acid oligamides, synthesis of amino alcohols, 101
Benzoyl peroxide, decomposition in styrene, 287
1,3-Butadiene, copolymerization with styrene, 569
p-(1,3-Butanedione)-*N*-phenylglycine, coordination compounds, 117
Butyllithium, copolymerization initiator, 569
tri-*n*-Butyltin *p*-vinylbenzoate, polymerization, S35
tert-Butyl vinyl ketone, alkali metal polymerization, S30
Chain, configuration, and rubber elasticity, 175
  transfer constants, dialkylphosphines, S46
Chlorination, phenol–aldehyde resins, 645
Coil dimension, hexene-1 polysulfone, S17
Condensation polymers, ferrocene derivatives, 651
Copolymerization, acrylonitrile, S32
  1,3-butadiene–styrene, 569
  crystallization of ethylene glycol–diethylene terephthalate, 277
  generalized equations, 1
  monomer reactivities, S11
  parameters, 411
  perester side groups, 65
Crosslinking, irradiated gelatin molecules, 321
Crystallite orientation, decrystallized and mercerized cottons, 471
  native cottons, 457
Crystallization, ethylene glycol–diethylene glycol terephthalate, 277
  evaluation of orientation, 543
  polychloroprene, effect of aging, 17
Cyclohexane–polystyrene, miscibility, 587
Degradation, irradiated gelatin molecules, 321
  thermal, polystyrene and polyethylene, 253
Density, fibers, gradient column, S52
Dialkylphosphines, chain transfer constants, S46
Dielectric dispersion, polar polymers, 597
Diethylene glycol terephthalate, crystallization in copolymerization, 277
Elasticity, chain configuration, rubber, 175
  theory, rubber, 149
Elastomers, crystalline, sorption and diffusion, 261
Equation, generalized copolymerization, 1
  terpolymer composition, 363
Ethylene glycol, crystallization in copolymerization, 277
Ferrocene derivatives, condensation polymers, 651
Fibers, jute, density gradient column, S52
  oriented PVA, viscoelasticity, 53
Films, spherulitic polymer, fracture, S47
Flow birefringence, use for lengths of rigid particles, S14
Free radical polymerization, aldehydes in vinyl chloride, 31
  effect of asymmetric centers, 491
Friction, internal, polyoxymethylene, 561
Graft copolymerization, with perester side groups, 65
  radiation-induced, monomer reactivities, S11
Graham salt, MW distribution, 603
Hexene-1 polysulfone, coil dimensions, S17
Infrared spectra, polypropylenes, 523
Initiator, butyllithium, 1,3-butadiene–styrene copolymerization, 569
Intrinsic viscosity, analysis of data, 343
  use for lengths of rigid particles, S14
Iodine, reaction with polystyrene, S18

Ion exchange, influence of structure on, 627
Ionic polymerization, isoprene, 201
low temperature, 193
Isoprene, radiation-induced polymerization, 201
Jute, density of fibers, S52
Light scattering, calibration of Brice-type photometer, S21
Lithium aluminum hydride, synthesis of amino alcohols, 101
Mechanical behavior, polycarbonates, S56
Methacrylyl alanine, effect of asymmetric centers, 491
Methacrylyl glutamic acid, effect of asymmetric centers, 491
Methylstyrene, PMR, S20
Molecular weight distribution, determination in PVAc, 301
Graham salt, 603
poly-α-methylstyrene, 221
Molecules, flexible polymeric sheet, S8
Monomer, highly polar, copolymerization equations, 1
reactivities, radiation-induced graft, S11
Nitriles, conjugated structures in products, S39
Nonelectrolyte solutions, theory of thermodynamic behavior, 587
Nuclear resonance, polyvinyl chloride, S6
Perester side groups, graft copolymerization, 65
Phenol–aldehyde resins, chlorination, 645
Phosphates, sodium, and derivatives with salts, 613
Polar monomers, generalized equation, 1
Polar polymers, dielectric disperson, 597
Polyaddition, Tung equation for DP values, 83
Polycarbonates, mechanical behavior, S56
Polychloroprene, aging and crystallization, 17
Polycondensation, Tung equation for DP values, 83
Polydimethylsiloxane, adsorption from solution, 127
thermal stability, 375
Polyelectrolyte solutions, dielectric properties, 241
high frequency effects, 229
Polyesters, linear, 385
Polyethylene, thermal degradation kinetics, 253
Polymethacrylic anhydride, PMR studies, 329
Poly-α-methylstyrene, MW distribution changes, 221
Polyoxymethylene, internal friction in, 561
Polypropylene, infrared spectra, 523
isotactic and atactic, S29
oriented isotactic, stress-strain, 505
Polystyrene, and cyclohexane, miscibility, 587
PMR, S20
reaction with iodine, S18
thermal degradation kinetics, 253
Polyvinyl acetate, molecular expansion, S3
MW determination, 301
Polyvinyl alcohol, viscoelasticity of oriented fibers, 53
Polyvinyl chloride, NR spectrum, S6
Propagation, in solid state, S1
Proton magnetic resonance, polymethacrylic anhydride, 329
poly- and methylstyrene, S20
Radiation, effects, evidence of polypropylene nature, S29
gelatin molecules in aqueous solution, 321
ionic polymerization at low temperature 193
isoprene polymerization, 201
Redox, vinyl chloride polymerization, 209
new system for vinyl polymerization, 45
Reduction polymerization, acrylonitrile, 107
Rigid particles, determination of lengths, S14
Rubber, elasticity and chain configuration, 175
stretched, isomeric hydrocarbons in, 261
theory of elasticity, 149
Salts, sodium metaphosphates and their derivatives, 613
Semiconductor properties, preparation of polymers, 621
Solid state, alternating intra-intermolecular propagation, S1
Spherulite, fracture in polymer films, S47
theory of shape, S40
Stereoregulation, effects of aldehydes on vinyl chloride polymerization, 31
Stereospecificity, and optical properties, 635
Stress-strain, oriented isotactic polypropylene, 505
Structures, conjugated, in products from nitriles, S39
Styrene, copolymerization with 1,3-butadiene, 569
decomposition of benzoyl peroxide, 287
vinyl chloride copolymerization, S31
Styrene sulfide, polymerization, 533
Suspension polymerization, vinyl chloride with redox initiators, 209
Temperature, radiation-induced polymerization, 193
vinyl chloride polymerization, 209
Terpolymer, composition equation, 363
Thermal degradation, polystyrene and ethylene, 253
Thermal stability, polydimethylsiloxane, 375
Thermodynamics, theory of nonelectrolyte solutions, 587
Theta point, PVAc molecular expansion, S3
Tung equation, distribution of DP values, 83
Vinyl, new redox system for polymerization, 45
Vinyl chloride, stereoregulating effects of aldehydes, 31
styrene copolymerization, S31
suspension polymerization, 209
Viscoelasticity, oriented PVA fibers, 53
